

Manual Printer Driver Installation

1. On the official manufacturer's website the printer model is searched

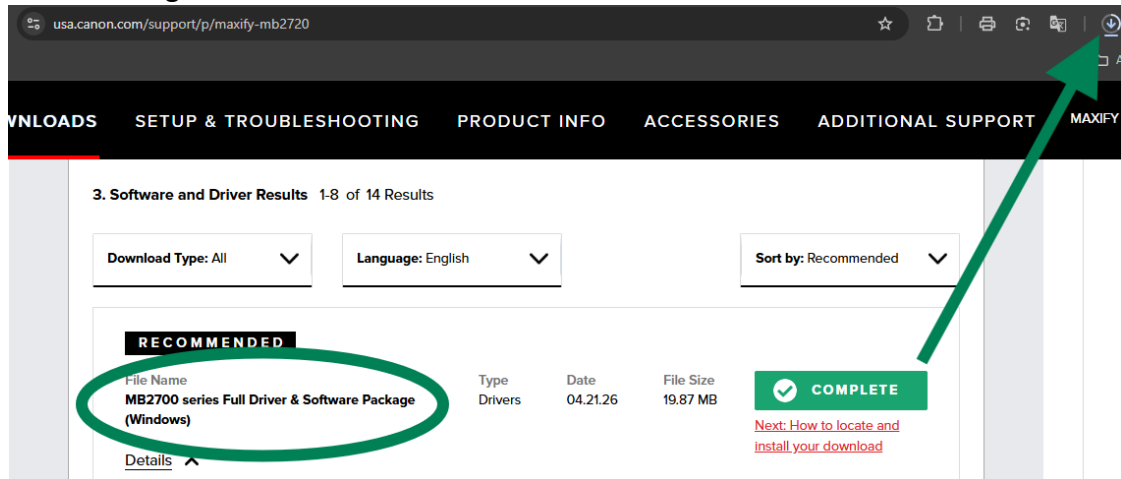

2. Drivers are specific to each operating system, so the driver you install depends on the OS running on the computer, in this case Windows.

DOWNLOADS

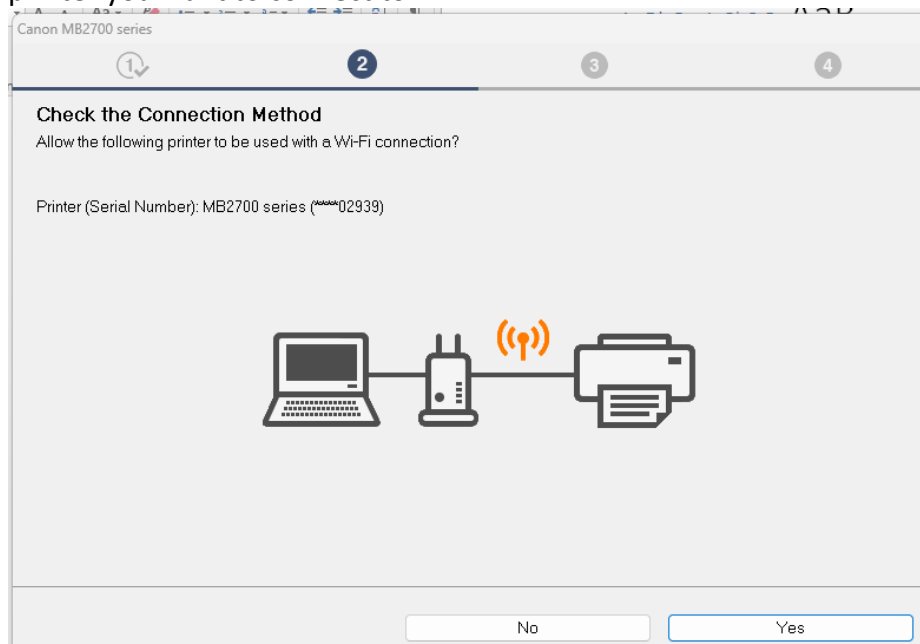

3. Downloading the driver

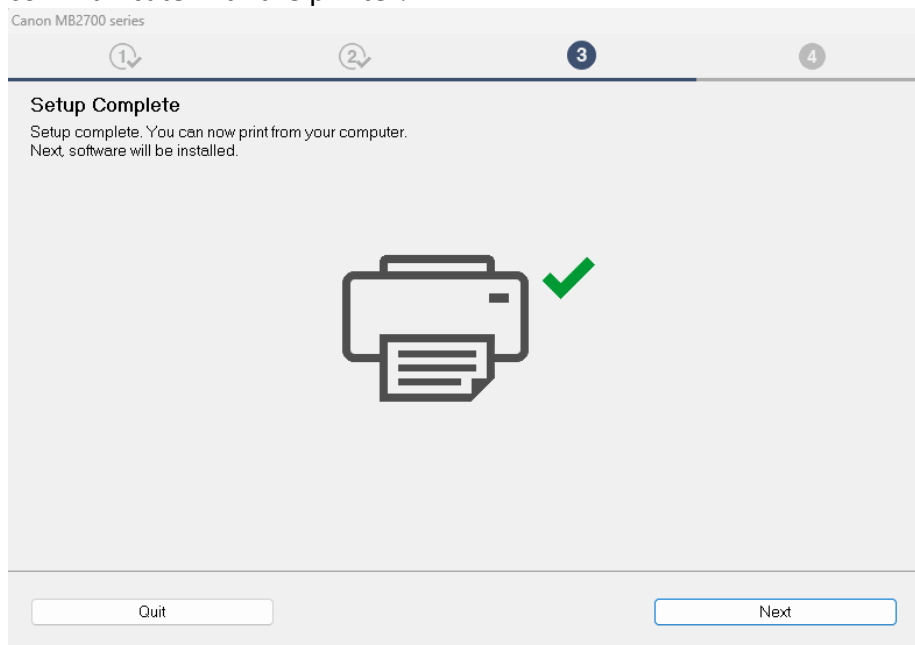

4. During the installation :

- The installer has found the printer on the Wi-Fi network and is asking “if this is the printer you want to connect to”

- The Canon printer driver has been successfully installed, and the computer can now communicate with the printer.

- The Canon printer driver and required software have been installed correctly
