

Connecting and Configuring a Wireless Printer

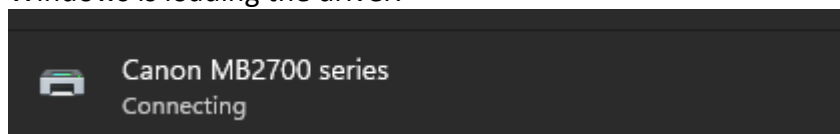

1. Clicking on “Add device” allows the computer to start searching for printers connected by USB, Wi-Fi or Network.

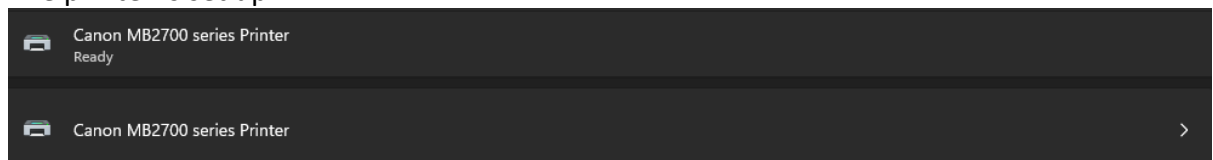

2. Once Windows detects a printer, clicking the "Add device" option next to the printer allows Windows to download and install the correct driver automatically.

3. Windows is loading the driver.

4. The printer is set up

5. To prove the printer works a test page is printed.
